JUN 24 2022

Clerk, U.S. Courts  
District of Montana  
Missoula Division

United States District Court Montana, Missoula County

Anthony Scott Charlie

Cause No.

Plaintiff,

vs.

Elon Musk

Space X

Defendant

Civil Tort Claim

1.) Comes Now Anthony Scott Charlie Pro Se Filing a Civil Tort Claim against Elon Musk and Space X because of Duty of being Tribal Homeland Security with the Responsibility to protect the Bundle of Life from all threats Foreign or Domestic meaning Country, Continent, and Planet.

2.) From Mr. Charlie's understanding Elon Musk and Space X single handedly removed the payday of payload Transportation from Russian space program and is trail blazing into becoming the Space Transportation of the Country and maybe the Planet eventually.

1 of 7

3.) Mr. Charlie recognizes that the Space Transportation Industry is becoming more developed and cost efficient and because of this advancement made possible via Elon Musk's determination and creativity; Space Colonization is then approaching faster than we collectively imagine Colonization; Mr. Charlie says, that this venture is not a "One Step for Man and One Giant Leap for Mankind" type deal. He says that Space Colonization is in the crease of Birth aka Atlatem, Old world New world discovery that could potentially lead into a Revolutionary War, (Inter Planetary War) and the only thing that is really slowing this process is the Technology of Architectural Design; and since Architectural Design is actively being developed and more cost efficient than we expected; it can and will be a real threat, especially, if most of the Quicker and know how is worked out on another Planet or Moon in our Solar System.

4.) Simply put Mr. Charlie is Seeing Elon Musk and Space X for 50 Billion and/or active Space Colonies built here on Earth that are Fully functioning; on the intellectual grounds, that like May Flower ship builders in the old days, that company removed Spain and old world

Power Status more so every day still today as our Country grows. Elon Musk and Space X are in the business of transportation to the highest bidder, Making them the most likely to be the accomplices to the Separating Colonist that have more Dry land to grow into. Mr. Charlie says because of Technology of Architectural Design and the Working Formula "One Matter of Three, Six, and Nine" there is no limits to the population growth outside of Earth's Atmosphere and with this understanding Mr. Charlie is setting The Standard of Montanias 13 Original Colonies. Which is, you have to have a Working Model of a fully functioning Space Colonization here on Earth Before you can Colonize outer Space, because, of the differences in operation and value of resources there will be a gap and maybe a conflict in understanding and communication between communities of Earth and Space which will then possibly widen over time unless we have fully functioning Space Colonization happening here on Earth.

- 5.) 50 Billion and/or fully operating Space Colonies on Earth sounds like a lot, but, in the scope of a Globalized Solar System it really is only a unit like a brick in a Mansion or a stone in a Pyramid, and

with proper application can securely create a sound foundation for many wonderful things to happen like a Globalized Solar System with 50 Billion Population and Eco Systems to supply Working Formula for.

6.) So, Mr. Charlie is not trying to bleed Elon Musk and Space X for financial gain. Mr. Charlie just recognizes their position in the development of a globalized solar system, but, with out The Standard of Montmaris 13 Original Colonies or what ever title you give the concept in your understanding of the Standard, globalized solar system will not happen and separation and disconnected communication will happen leaving Mother Earth behind in Inter Planetary knowledge and defenses.

7.) As we establish and agree that space Exploration and Colonization puts all of us, community, state, country, tribe, and future generations in real danger because of the way it is going right now Mr. Musk is a Martian using Earth's supplies to build his country and planet for what ever his whimsical desires are; with Earth knowledge and then Interplanetary knowledge and the advantages of New never before seen developments in Architectural Design of

offensive and defensive nature. With this established fact I do have legal merit to challenge not only the accomplice, but, the Creator of opportunity to Space Transportation and colonization. I do have a valid claim because even though there is fractioned like separation in corporate business between transportation and colonization as of today but when opportunity becomes available they will come together creating birth of a New Planet with its own Nations and agendas, and because of its ground up build in harsh environments its tear down ability of our Environment will be easier to understand and do for them, and as of now history repeats itself unless a type of evolution happens physically or intellectually.

- 8) Mr. Charlie is not saying that the Sky is falling because the Rockets are Flying. He is saying Develop Earth by making Fully Fractioning Colonies here, which he calls Pyramid by Reduction from Alaska to the Tip of South America, starting in Montana. This will create a "Show Room" or platform for investors to see exactly how Colonization in space will happen from the Ground up, which, will enable more Colonies to happen and in more places than now; which, will enable Market and Globalized Sales Systems; instead of,

a potentially single separating colony and this means more destinations for Transportation.

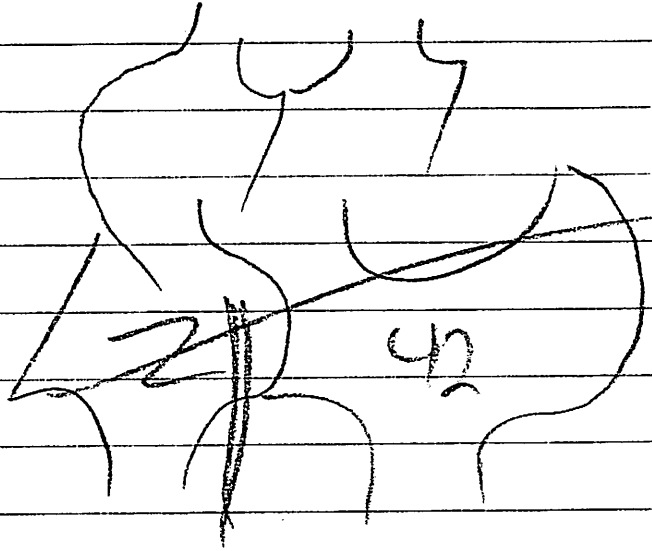

9.) In Summary Mr. Charlie is in Duty of Tribal Homeland Security challenging Space Transportation and Colonization Opportunist because of threats of Governmental like Creations and Separations built on and around different Survival Mechanisms that will grow into strange new Culture and belief systems that could be confrontational with Earth. Mr. Charlie is Setting the Standard of Montano's 13 Original Colonies not for Frivolous ideas but to protect the Bundle of Life because Mr. Charlie sees that the Technology of Architectural Design is here, because he is creating it.

10.) In Closing Mr. Charlie is attaching a copy of The Standard of Montano's 13 Original Colonies which is in a Civil Lawsuit called DU-21-1342 Rept # 4 were Mr. Charlie is addressing another issue while at the same time using the situation to create reference material for understanding how Technology of Architectural Design is really here.

Signed and Dated this 13<sup>th</sup> Day of June 2022
